MegaArray implements ListInt

SuperArray super

Constructor method — instantiate SuperArray
String toString() — return super.toString()
Sort() — sorts SuperArray
add(int) — calls super.add(int) then sort()
int remove(int) — return super.remove(int)
int set(int) — return super.set(int)
int size() — return super.size

Sort(): for each index, iterate from index+1 to end
      if value at index is ever less than value of higher index, swap values
         - use set(int, int)
         - use temp int
